

Chan Jin Park Area Cloud Solution Architect SAP on Azure Microsoft

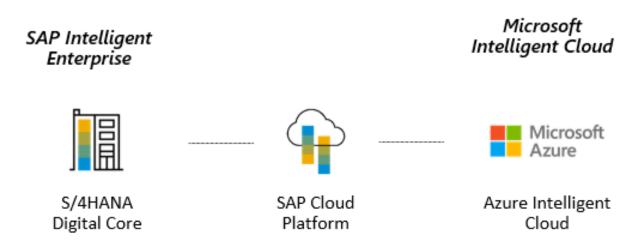

What is SAP Cloud Platform (SCP)?

SCP is a PaaS offering available on Azure, AWS and GCP

SCP allows customers to build and extend new business and mobile apps, to integrate and connect with ERP systems, regardless of the application location or data source

Microsoft is the only Public Cloud provider who has a 3-year agreement to resell SCP services under a CPEA on Microsoft Paper

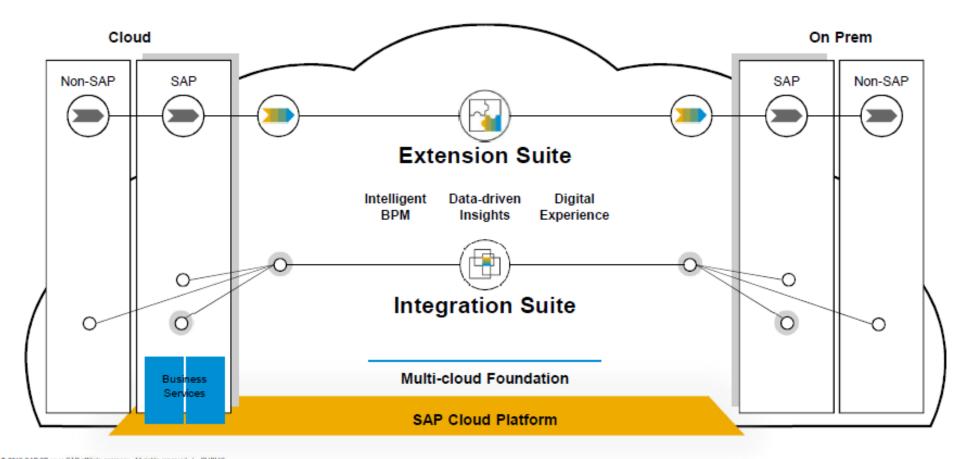

Increase business agility and efficiency with SAP Cloud Platform

Your choice for integration and extensions

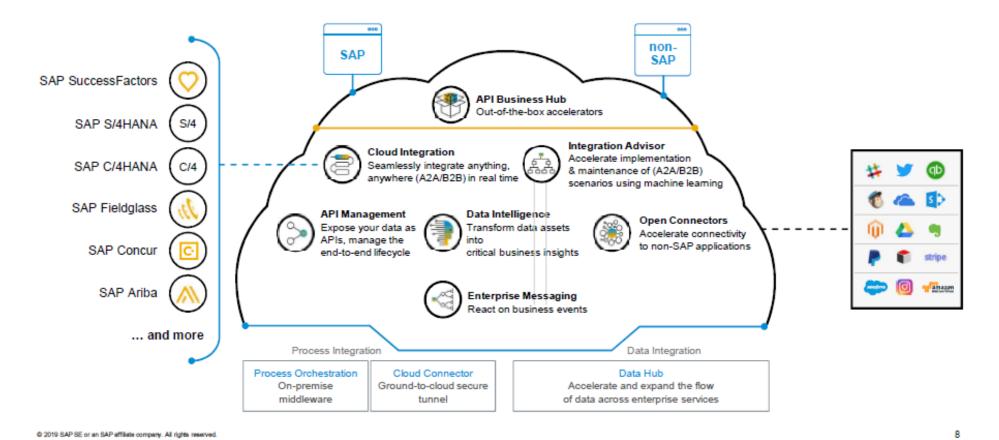

SAP Cloud Platform Integration Suite

Enterprise Integration Suite for Hybrid and Heterogenous Environments

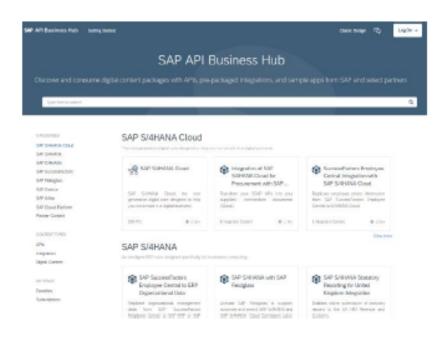

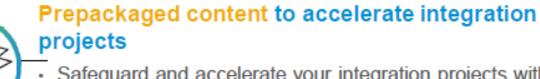

SAP Cloud Platform Integration

- Safeguard and accelerate your integration projects with out-of-the box integration content
- Prepackaged content to integrate SAP and non-SAP applications, such as e-Document compliant integration with tax authorities
- Search, discover, experience, and consume the right predefined integration packages from SAP and selected partners
- Open to partners for developing content and connectivity
- Integration content can be deployed on SAP Process Orchestration (starting with release 7.5)

Open to the Ecosystem

- · Ability to integrate with business networks
- Open to partners for developing integration content and adapters

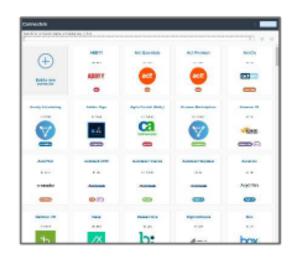

SAP Cloud Platform Open Connectors

Accelerate connectivity to third-party applications

Pre-built C Out of the l

Pre-built Connectors

Out of the box connectivity to non SAP applications.

- Feature rich connectors to 150+ non-SAP applications.
- Easily connect to top SaaS application in use
- Built-in interactive API documentation in Open API Spec

Common Resources

Canonical data model to extend connectors

- Create consistent data model based on your integration needs
- Pre-built common resources that can be easily extended

8

 \circ

Formulas

Easily build API compositions across connectors

Build a single template that you can reuse with

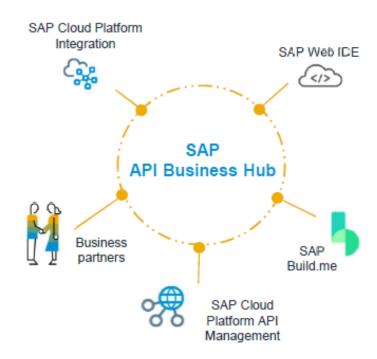

SAP Cloud Platform API Management

Secure, manage & govern APIs in the cloud

Fine grained Access Control of API Assets realized via Role based permissions

- Permissions based on Roles for Discovering Products and Consuming Applications in DEV Portal.
- System prompts the Admin of a Role is missing / deleted.
- Error proof method to create API Proxies by changing Properties from existing templatized API Proxies, flexibility in managing multiple proxy virtual host endpoints, visually appealing interface.

Discover diverse catalog – SAP API Business Hub Themes, search, filters and featuring

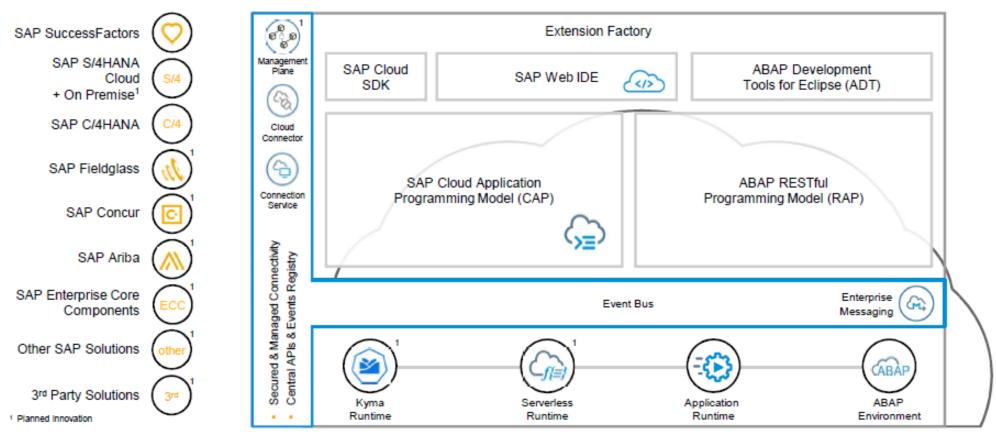

- New user experience that draws user to the most popular of the 250+ packages
- Product themes, search and filters help users navigate 830+ integrations and ~750 APIs
- Favorites and Subscriptions to keep user up to date with the latest content

Building Extensions for the Intelligent Enterprise on SAP Cloud Platform

Microsoft

SAP Intelligent BPM for Live Processes

Live Processes offer discovery of pre-defined content, real-time authoring and launch (publish to production) of non-complex business processes without coding. Customers "Go Live", and stay flexible in production.

Process Experiences*

Integration of sentiments with Experience Management solutions from SAP (Qualtrics) on product, brand, and customer and employee experience to Live Processes

Process Flexibility*

Configuration of process variants for LoB experts, process extensions, decisions, and responsibilities

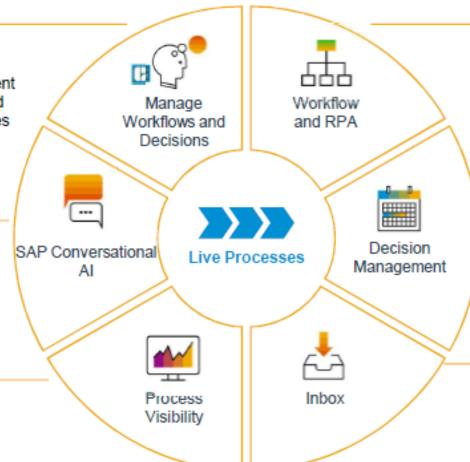

Conversational User Experience

Process Intelligence assistance with SAP Conversational AI

Machine learning identifies hidden patterns in knowledge-intensive processes and learns from the data without being explicitly programmed

Process Intelligence

SAP Cloud Platform Process Visibility SAP Process Mining by Celonis, cloud edition

Intelligent Automation

Integrated offering of SAP Cloud Platform Workflow to automate structured processes with SAP Intelligent Robotic Process Automation (RPA) to run repetitive, unstructured, and user interface-focused tasks

Automation of decisions with SAP Cloud Platform Business Rules

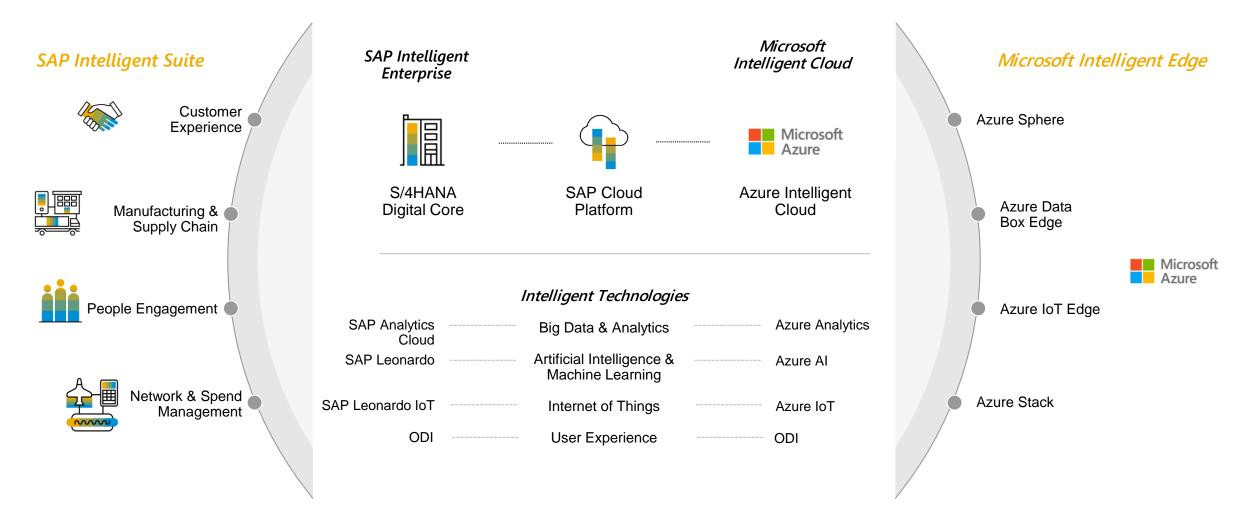

Live Process Content

Process documentation from enterprise architecture to value and process flows, implementation blueprints

Digital Experience

Management of tasks centrally in portal, central SAP Fiori launchpad, mobile BPM

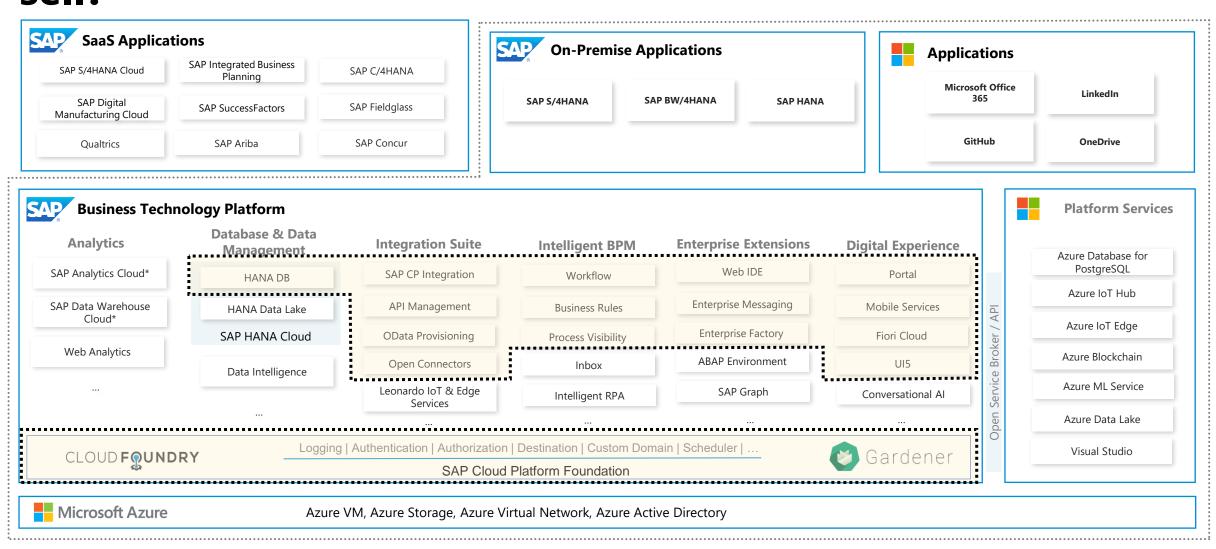

How SCP drives a joint SAP/Azure solution

Business Architecture on Microsoft Azure – what we resell?

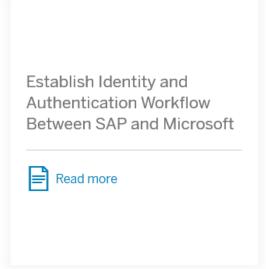

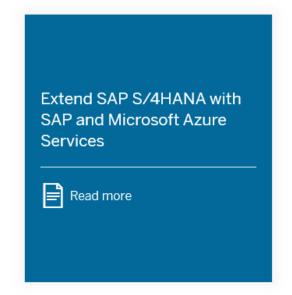

SAP Cloud Platform (SCP) on Azure Embrace Use Cases

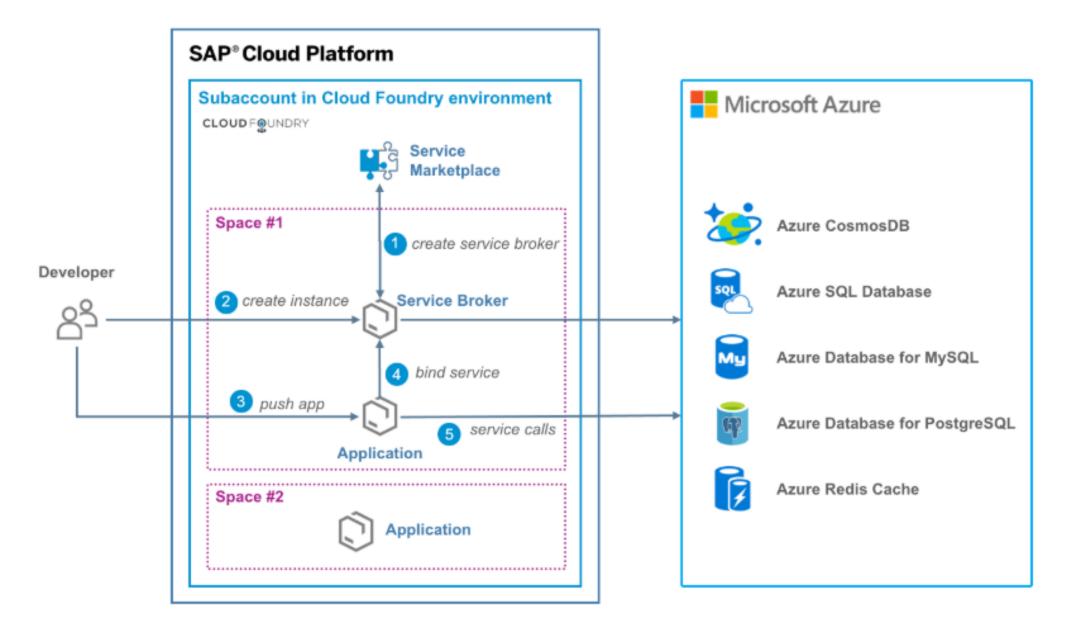

Use case 1

Consume Azure Services in SCP

Open Service Broker, SAP Cloud Application Programming Model + Azure Blob Storage

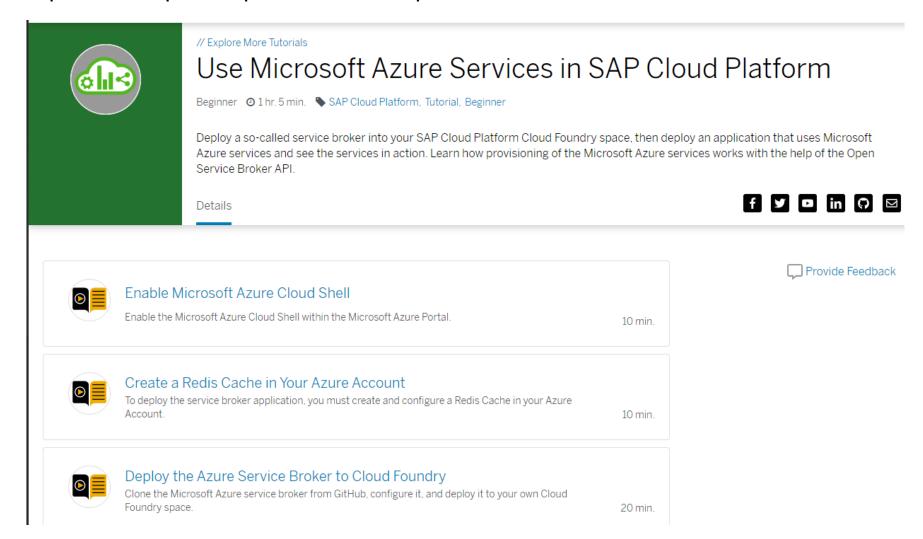

Demo Open service broker Azure (OBSA) deployment

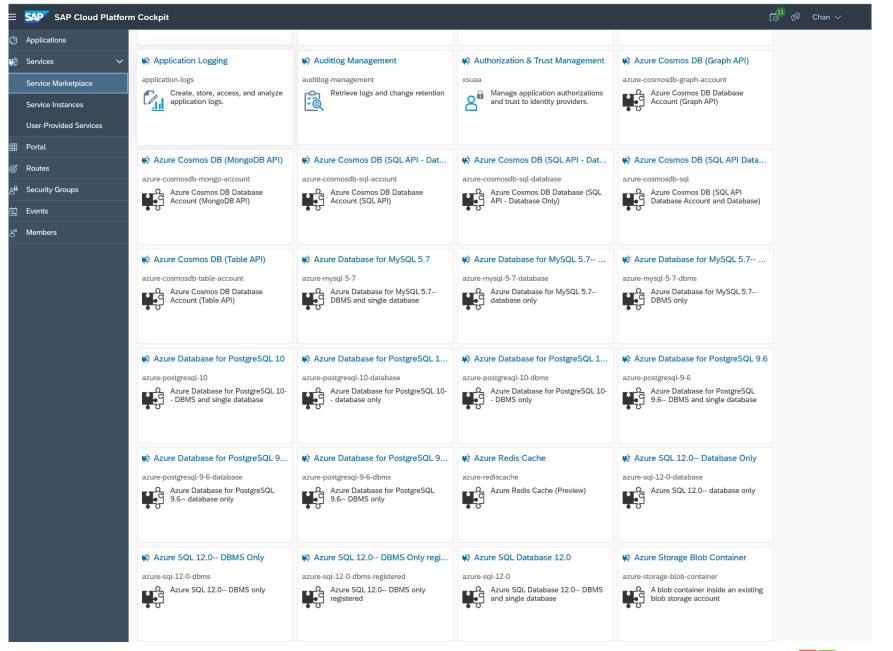

https://www.sap.com/products/cloud-platform/use-cases/consume-azure-services.html?btp=deb33688-7f0d-4bd1-bfec-f6fb7f103b0b

https://developers.sap.com/mission.cp-azure-services.html

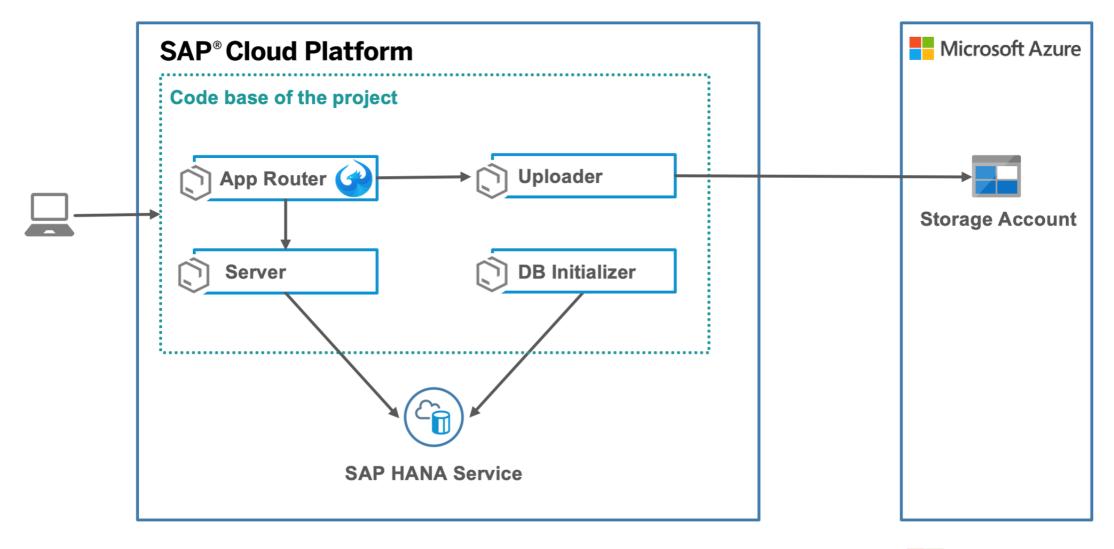

Architecture

The project consists of four modules, as shown in the architecture diagram:

Demo cf MTA deployment

Multi-Target Application (MTA)

Instead of separately deploying applications and then making them work together, you package them in one specifically structured bundle, and deploy them in one run.

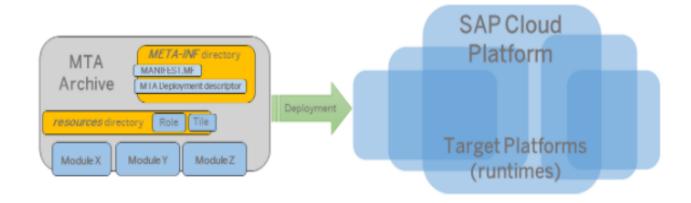

Figure 1 – An MTA with its components, and a Cloud with its runtimes

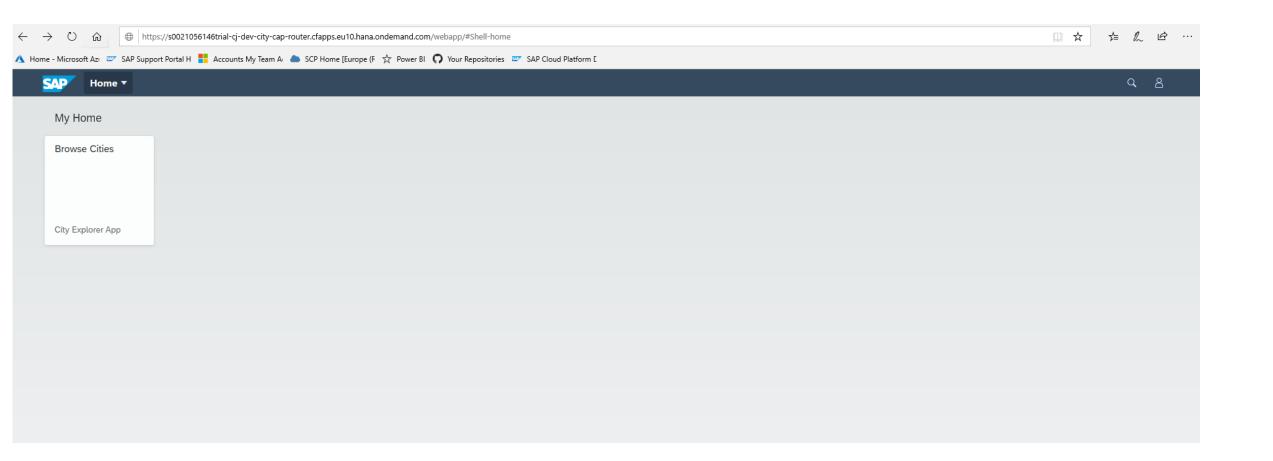

https://developers.sap.com/tutorials/cp-osba-azure-test-application.html

https://github.com/SAP-samples/cloud-foundry-cap-azure-cities

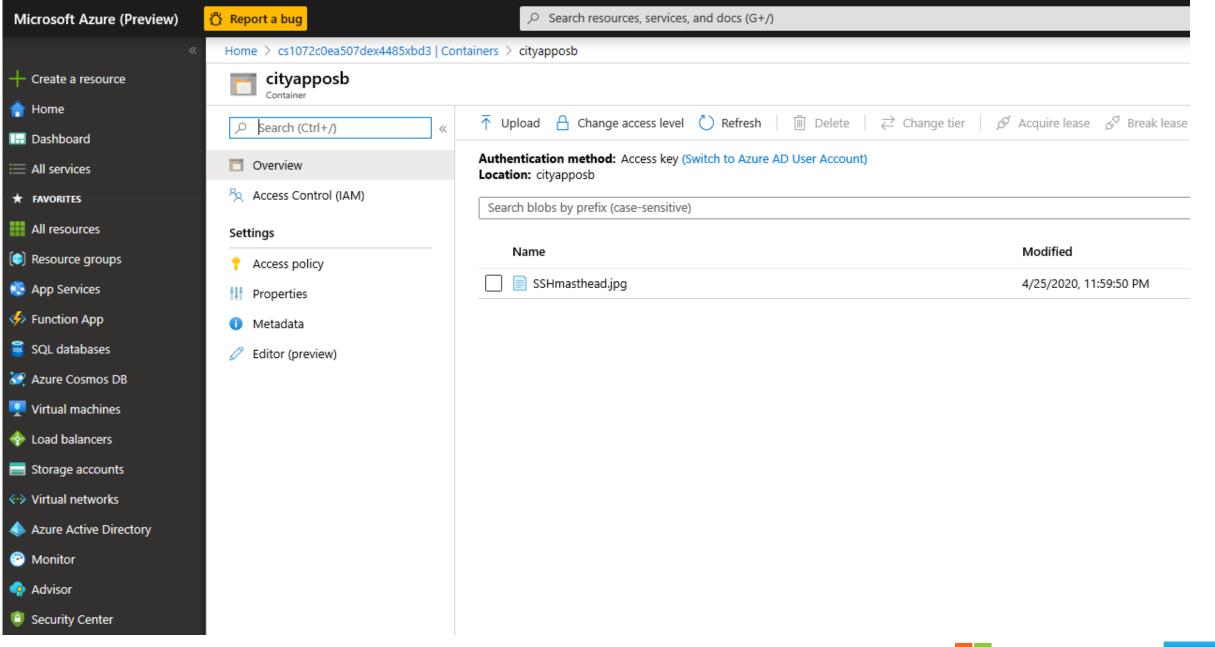

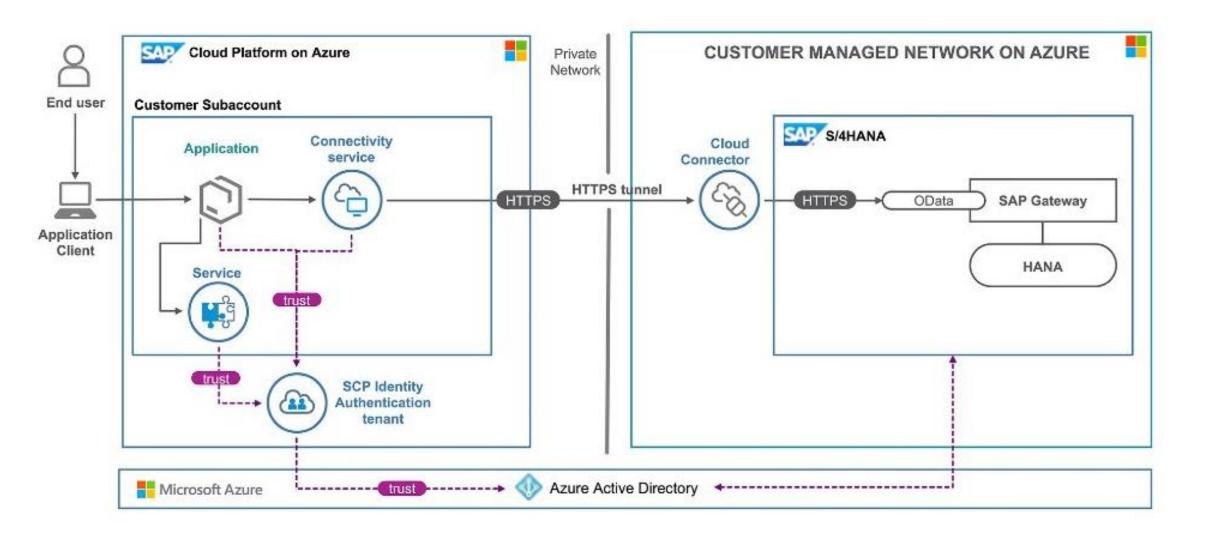

Use case 2

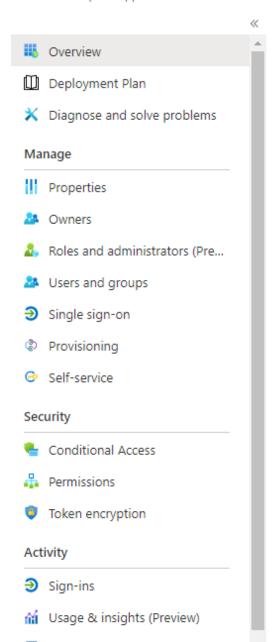

Establish identity & authentication workflow between SAP and Microsoft

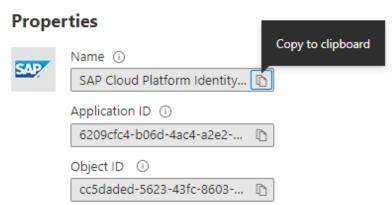

SAP Cloud Platform Identity Authentication | Overview Enterprise Application

Getting Started

1. Assign users and groups

Provide specific users and groups access to the applications

Assign users and groups

2. Set up single sign on

Enable users to sign into their application using their Azure AD credentials

Get started

3. Provision User Accounts

Automatically create and delete user accounts in the application

Get started

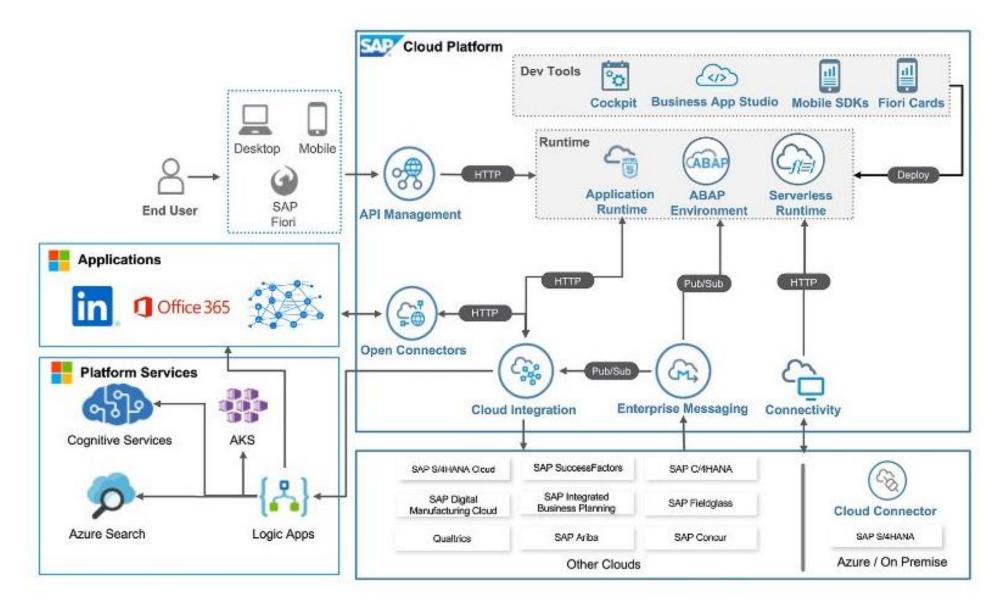

4. Conditional Access

Secure access to this application with a customizable access policy.

Create a policy

Use case 3

Extend SAP S/4HANA with SAP and Microsoft Service

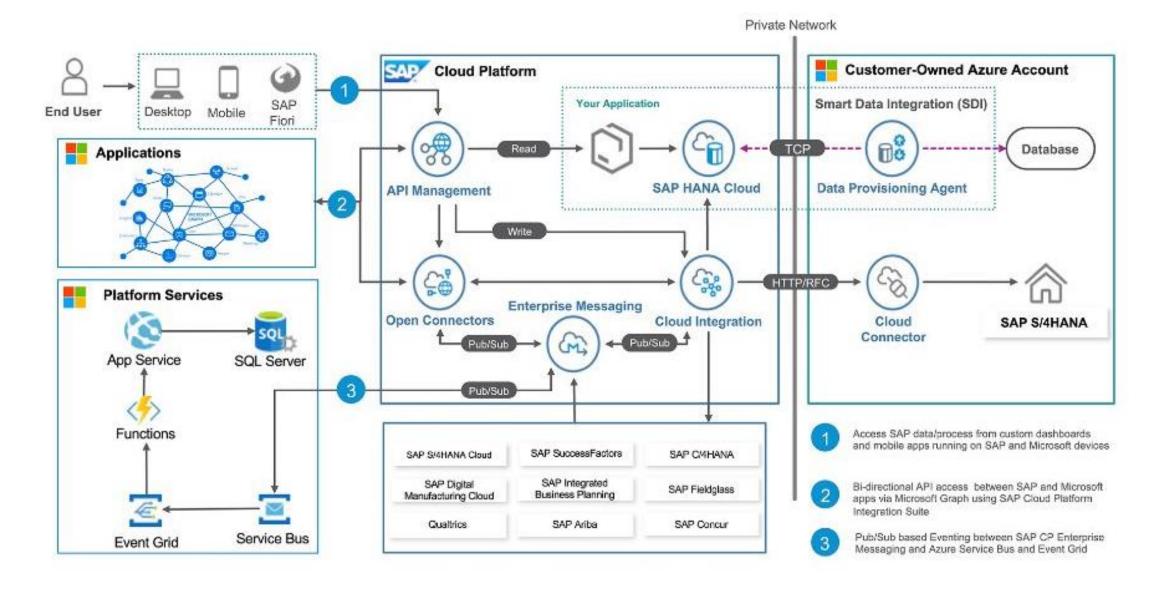

Use case 4

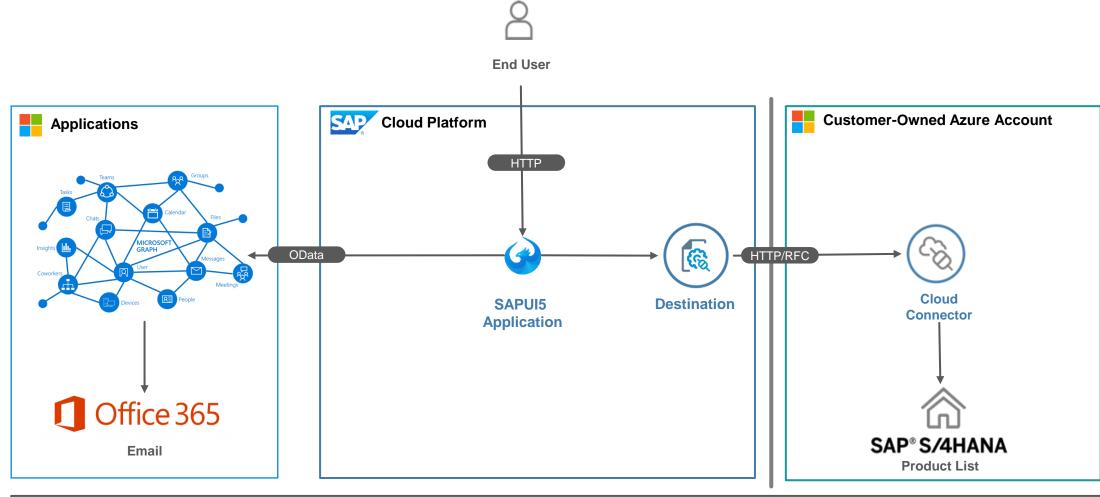

Simplify business process integration across SAP and Microsoft

Connect Office365 and SAP Data Through by SAP UI5 Apps

Azure VM, Azure Managed Disks, Azure Blob Storage, DNS, ExpressRoute, Azure VNet, Firewall, Azure AD

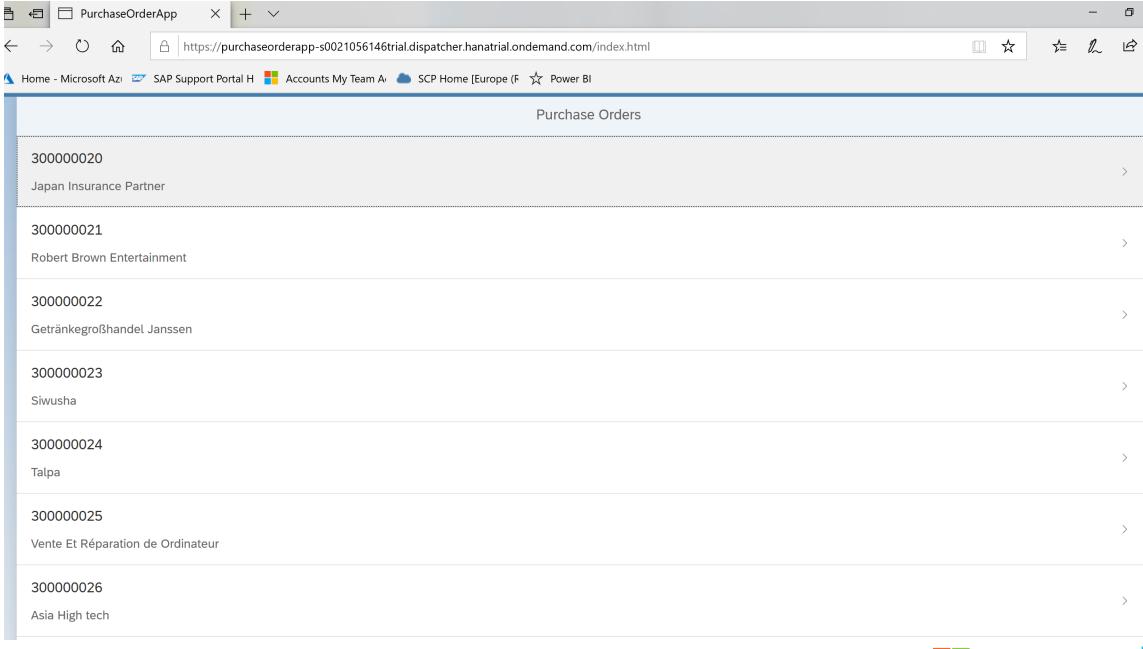

Demo Connect Office365 and SAP Data Through by SAP UI5 Apps

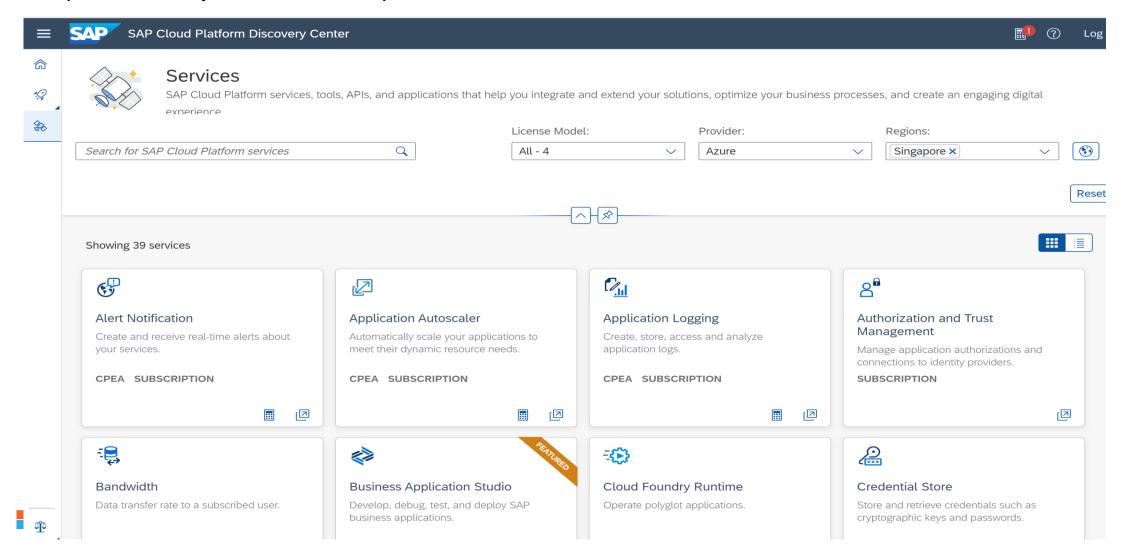

Available SCP Services on Azure | Singapore
